

PRECISION GRINDING

- If it doesn't fit, it wasn't from us -

13 fully automatic machines « Made in Germany »

Flat-parallel grinding with maximum accuracy

- **6** Rotational Grinding Machines • **7** Linear Grinding Machines

Systems for grinding **small to large series** of parts with various dimensions:

- Material thickness 0.7 mm – 20.0 mm
- Size $\varnothing 20$ mm – $\varnothing 200$ mm
- Feasible with extremely precise tolerances (up to $0.005 \text{ mm} \pm 5 \mu\text{m}$)

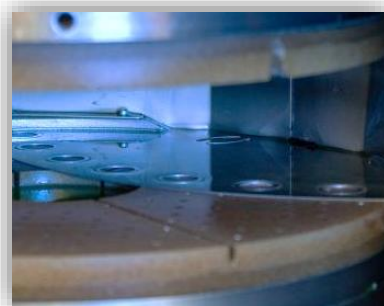

Highest precision in the micrometer range

Automated **process control**

High **production capacity**

- Optimal productivity with up to 45,000 parts per hour

Special shapes available on request

Discover our grinding expertise!

PRECISION GRINDING

Comprehensive Post-Processing:

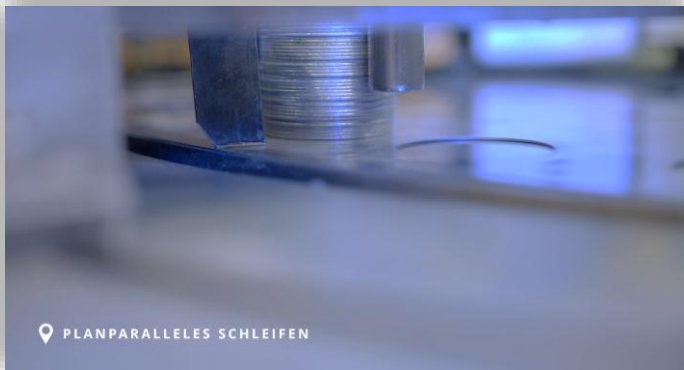

- Deburring
- Degreasing
- Cleanliness
- Heat Treatment
- Surface Treatment
- Corrosion Protection
- Quality Control & Packaging

Example Applications:

- Shim Washers
- Filter Plates
- Sealing Discs
- Precision Parts
- Anchor Discs
- Brake Pad Plates
- Retaining Plates
- Clutch Discs
- Pressure Discs

„Zero - Waste,, Production:

- Recycling of Cooling Lubricants
- Waste Recovery (Grinding Sludge)
